PT Semesta Olah Lestari

Established in November 2022, PT Semesta Olah Lestari (SOL) is a footwear manufacturing company based in Tangerang Regency. We produce premium-quality outsoles at competitive prices using advanced and environmentally responsible manufacturing technology.

About Us

PT Semesta Olah Lestari (SOL) was established to meet the needs of local and international footwear brands for high-quality outsoles made from carefully selected materials and customized to client requirements. Our products are designed to add value and strengthen the market appeal of our clients' footwear.

We are committed to supporting the growth of Indonesia's footwear industry by helping brands create comfortable, reliable, and high-quality products. We have also expanded our product range to include shoe foxing and mats for sports applications.

“Together, Let's Build the Future

Vision

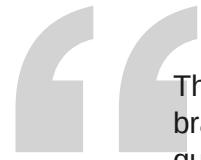

To manufacture high-quality local outsoles at competitive prices and achieve world-class standards for the international market.

Mission

1. Continuously improve and develop the quality of our outsoles
2. Use carefully selected materials to maintain our clients' product quality
3. Ensure every product meets quality standards and client expectations
4. Continuously innovate to create world-class outsoles

Founder's Message

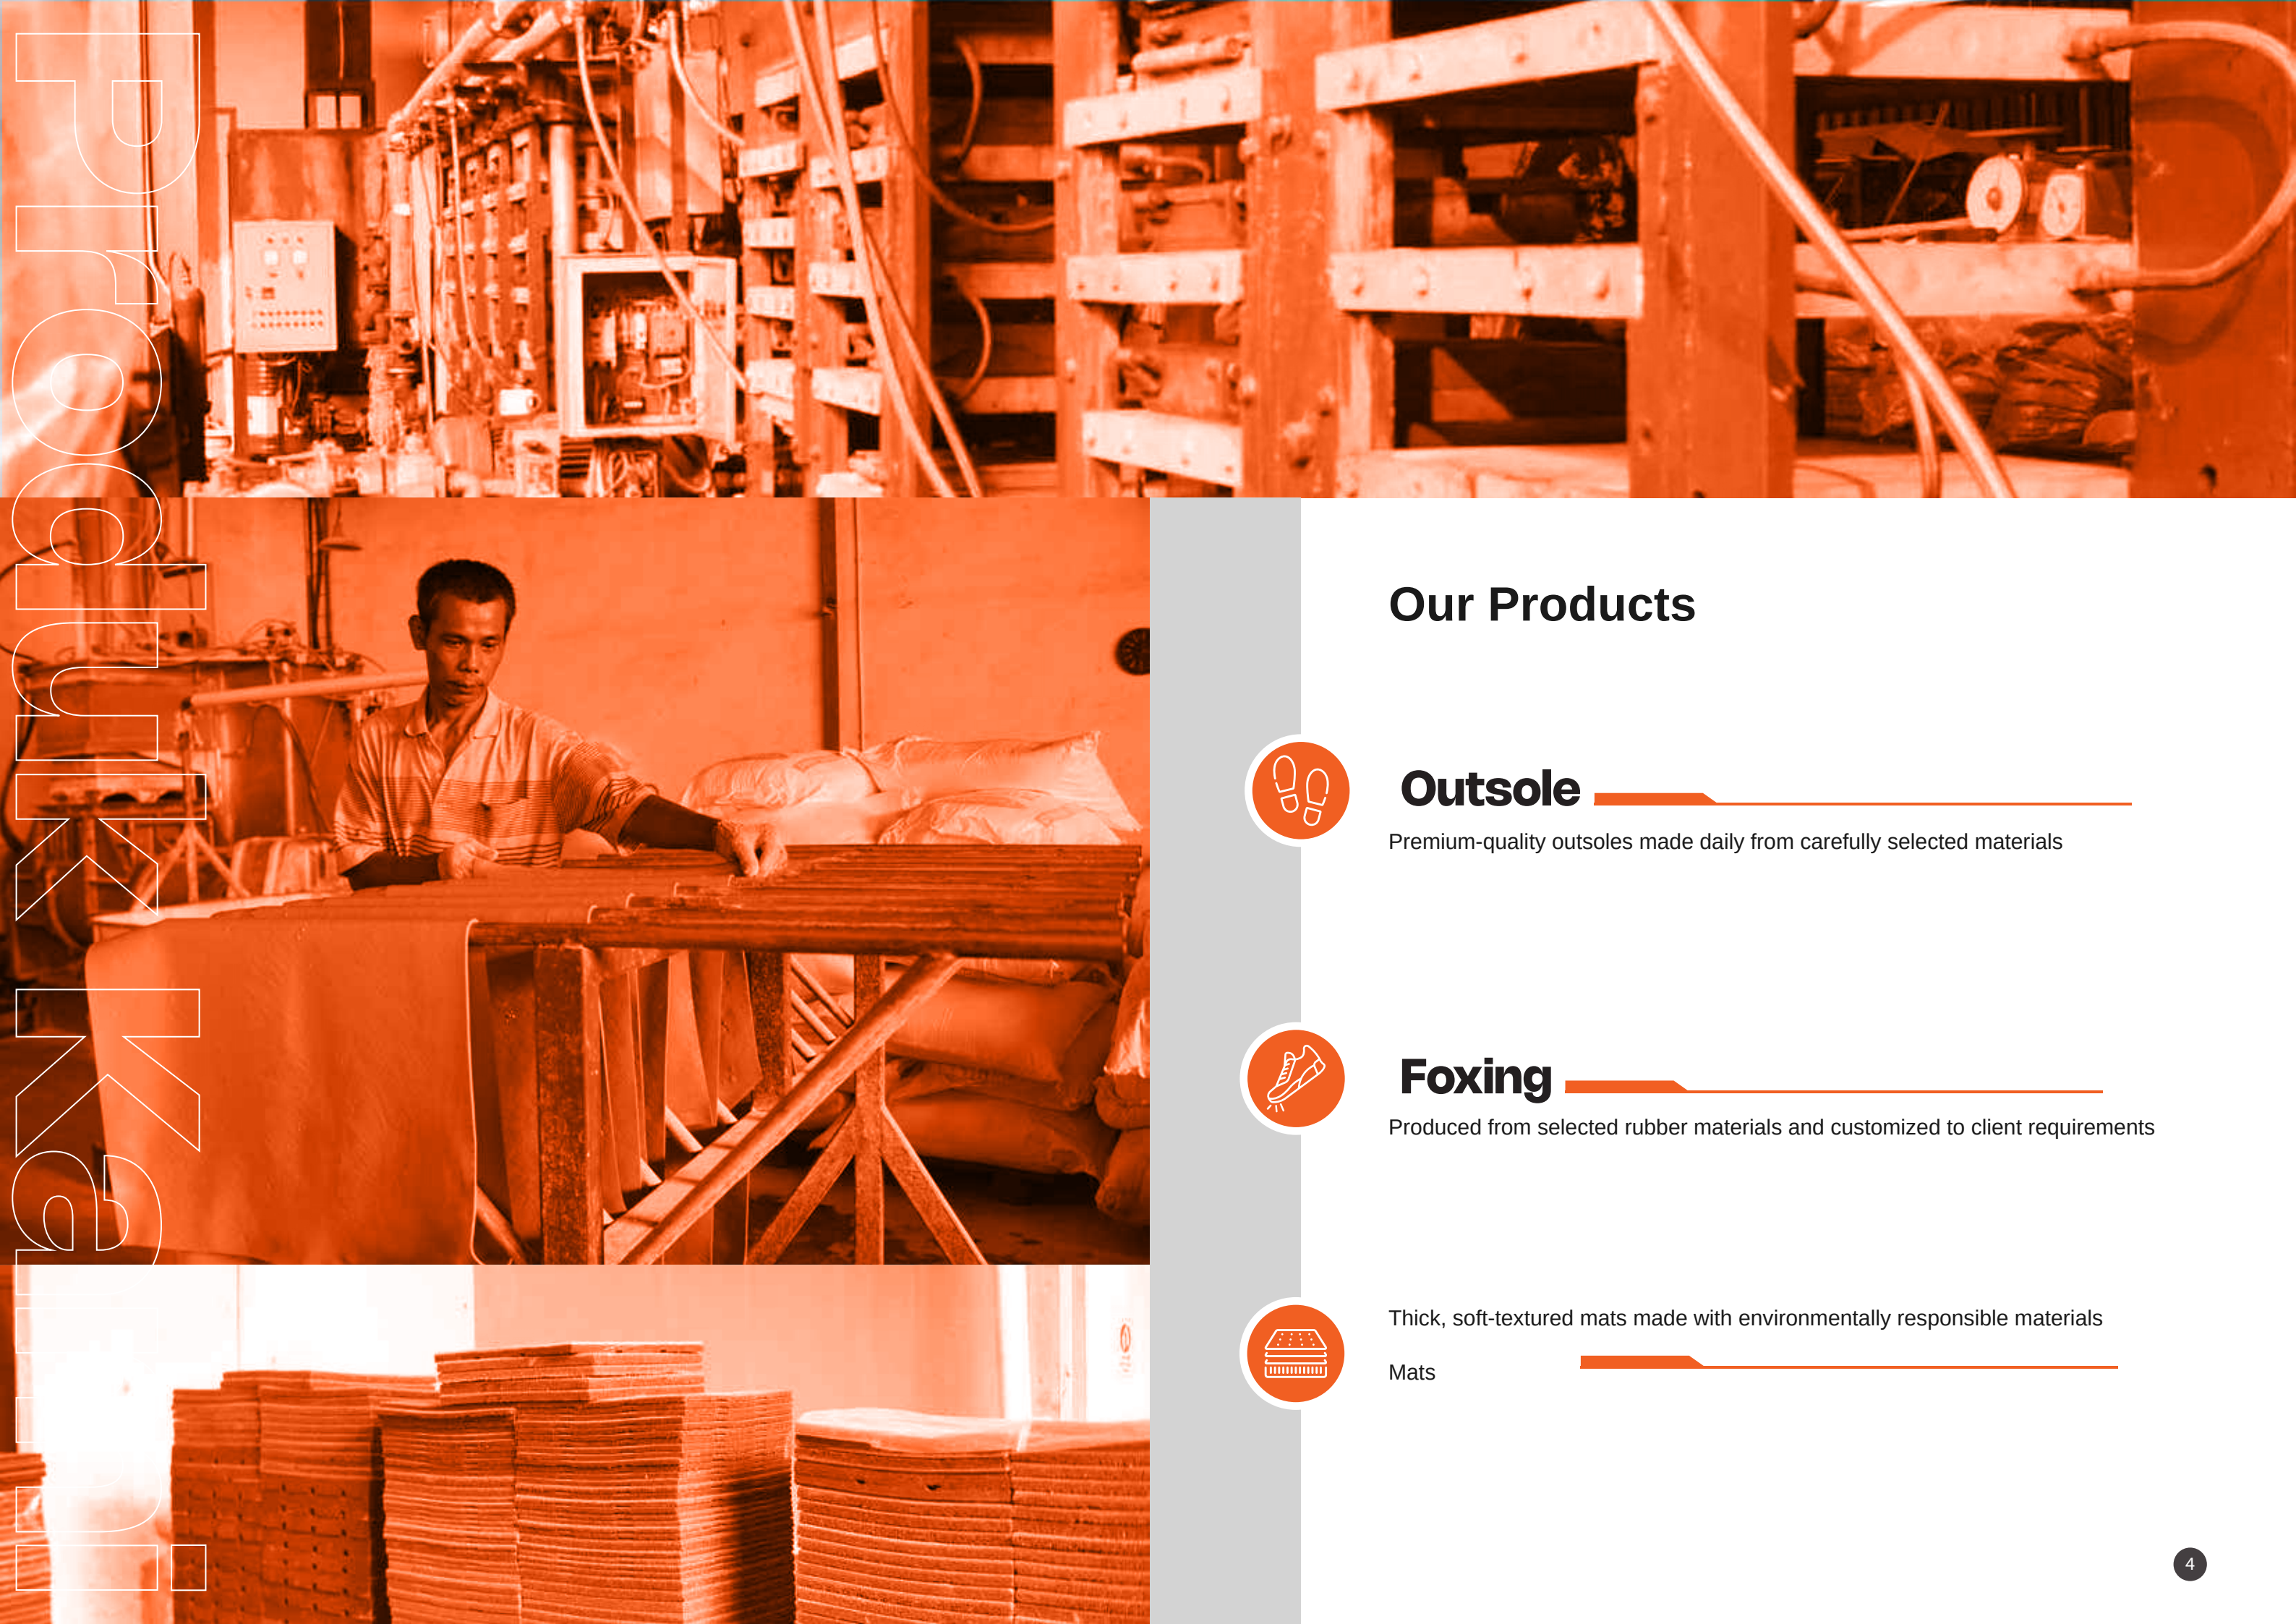

The rapid development of fashion trends and the emergence of many new footwear brands in Indonesia have created greater variety for consumers. However, product quality does not always develop at the same pace, and local brands can still be underestimated when low-quality materials result in products that are easily damaged.

PT Semesta Olah Lestari (SOL) supports both local and international brands through collaboration in creating premium-quality footwear that can compete globally. Our goal is to help build pride in Indonesian-made products by delivering quality that meets international expectations.

Our Impact

Enhance Product Value

Great footwear starts with high-quality materials. Our outsoles enhance the value of our clients' products while preserving each brand's unique identity.

Opportunity to Scale Up

Strong product value and consistent quality help brands expand their market reach and compete more effectively, including in international markets.

Opportunities to Attract Investors

High-quality products made with carefully selected materials can strengthen a brand's position and create greater opportunities to attract investment.

Why Choose Us

Professional Service

PT Semesta Olah Lestari (SOL) continuously improves materials and other requirements according to client needs. We regularly evaluate our systems and conduct routine monitoring using area checklists, while using only proven machinery and equipment. Client satisfaction is a key responsibility in our contribution to advancing Indonesia's footwear industry.

Premium Quality

To produce premium-quality products that can compete internationally, PT Semesta Olah Lestari (SOL) uses carefully selected materials and formulations from trusted suppliers. This supports footwear brands seeking durable, high-quality locally manufactured outsoles.

Skilled Workforce

Our team includes technicians, machine operators, production personnel, administrative and office staff, security personnel, and other supporting employees. Every employee receives training and works professionally in accordance with strict SOPs to produce premium-quality products that meet client requirements.

Trusted Suppliers

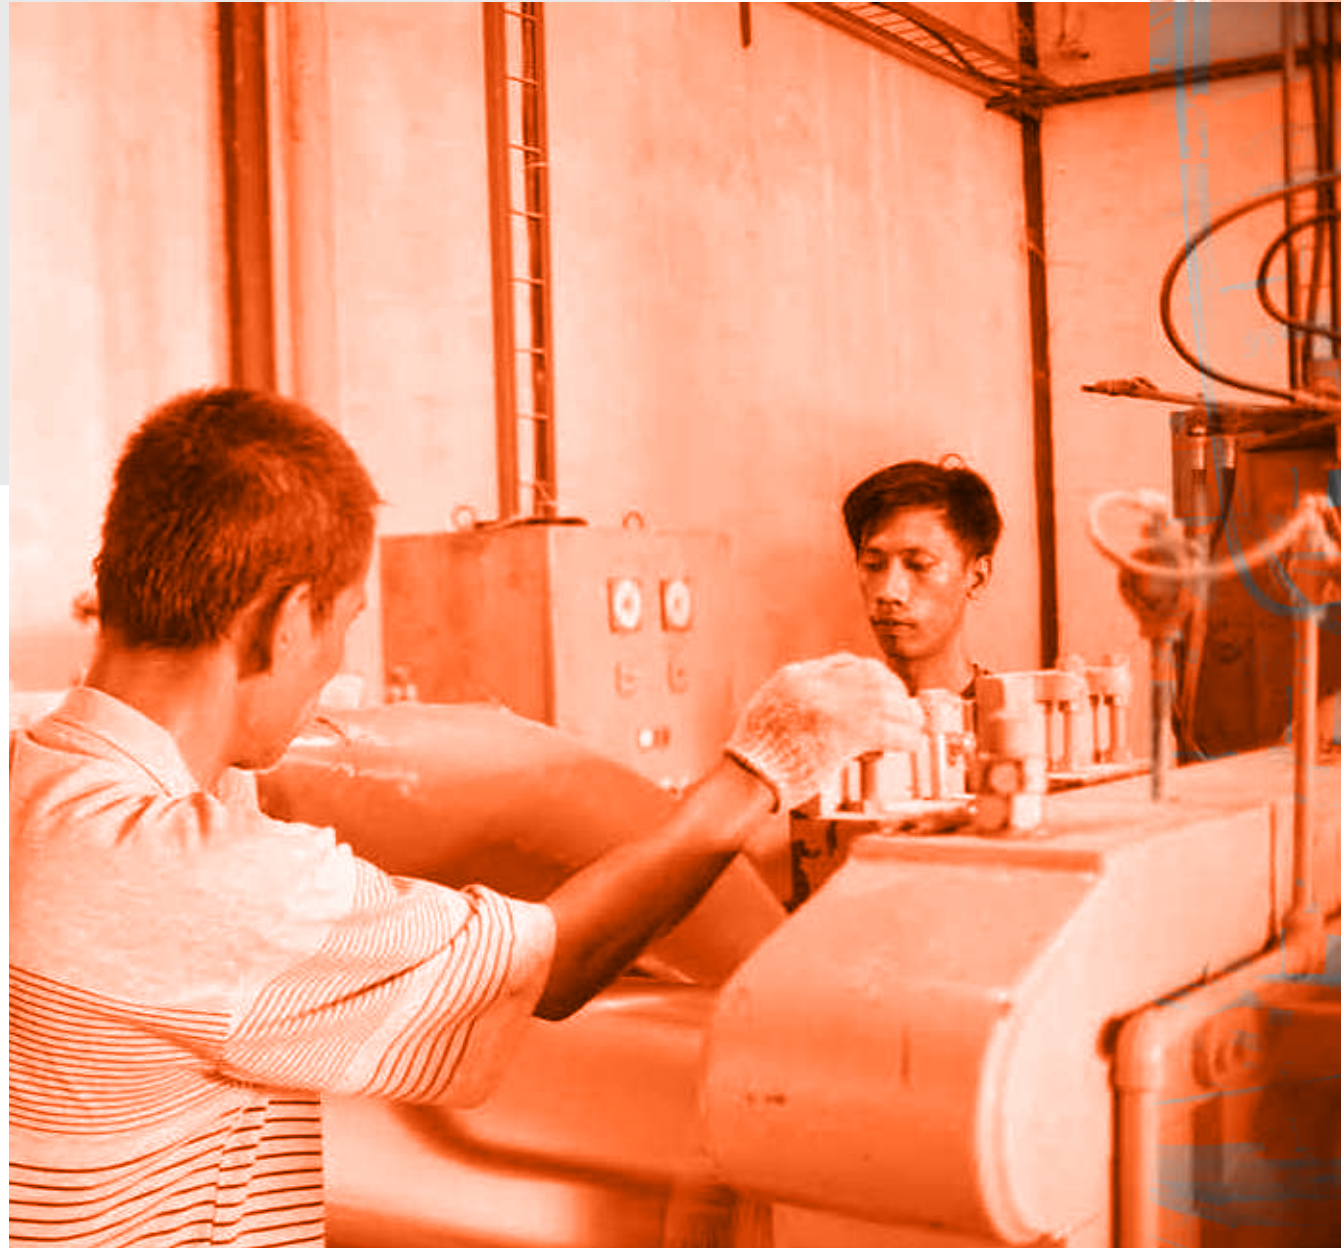

PT Semesta Olah Lestari (SOL) works with trusted material suppliers and has established cooperation with well-known Indonesian footwear brands, including Compass, Ortuseight, and Eiger.

Continuous Innovation

"Without innovation, everything will eventually fade." This principle drives us to become a leading outsole manufacturer in Indonesia. Our innovation includes improving product quality, materials, and other requirements in line with market trends and client needs.

Quality Control Protocol

We maintain production oversight through a Quality Control protocol consisting of three main stages:

Preparation

Define the required product quality standards, identify defects or non-conformities, and plan the Quality Control methods to be applied.

Implementation

Apply Quality Control techniques such as Fishbone Diagrams and Checklists to evaluate product quality.

Evaluation

Evaluate whether the product meets the required quality standards. Any defective product identified will be rejected and disposed of in accordance with the applicable SOP.
